Ann po

The Community Development Institute (CDI) at UNBC is pleased to present its 2008 Annual Report. This report covers the period from January to December 2008.

B c o nd

The mission of the Community Development Institute (CDI) at UNBC is to support the research, information, and development needs of Northern BC's rural and small town communities as they adjust to change in the new economy. The CDI is interested in two fundamental issues for northern BC's communities: community capacity and community development. By undertaking research, sharing information, and supporting community outreach, the CDI is becoming a vital partner to communities interesting in making informed decisions about their own futures.

Under changing social and economic conditions, communities need the capacity to respond. Community capacity refers to:

the ability of residents to organize their assets and resources to achieve objectives they consider important. These objectives may be reactive, where people are faced with a challenge, or innovative, where new visions are established and pursued. Community capacity is built and maintained by the norms, traditions, regulations, and social relationships enabling otherwise disparate individuals to co-ordinate their actions for collective ends.

To enhance this capacity requires community development. In a general sense, community development concerns:

improvements to local social and cultural infrastructure. It is most often identified with increasing the skills, knowledge, and abilities of residents to access information and resources and to then use these tools to create strategies and partnerships which can take advantage of changing circumstances.

The three foundations of the Community Development Institute at UNBC are:

- Research
- Education
- Outreach

The Annual Report is organized under each of these foundations.

C/

The Community Development Institute at UNBC maintains a clear focus upon research. Its goal is to balance both applied and basic work so as to maintain academic credibility and to be of practical relevance to communities. Copies of all completed project reports have been sent to community partners, funding agencies, the Weller Library at UNBC, and most local government/band offices and public libraries in places where the research was carried out. Reports and other research information are also placed on the CDI website (www.unbc.ca/cdi) as an integral part of our mission to share research widely across northern BC. Additionally, summaries of projects are also noted in the CDI Newsletters, which are published quarterly and distributed across northern BC via email.

Pro ec

Tumbler Ridge Mayor's Task Force on Seniors' Needs 2008 Completed

The purpose of this project was to explore the housing and support service needs of seniors in Tumbler Ridge. The work was carried out by the Community Development Institute to provide local community decision-makers with information relevant to service planning and infrastructure investments. The project was carried out in the winter of 2008 and included Census population information, community focus groups, and a door-to-door household survey. In addition to the project reports, information was shared via an on-going participation in the Task Force meetings and 3 community town hall meetings.

http://www.unbc.ca/cdi/seniorhtml.html

District of Hudson's Hope Seniors' Needs Dialogue 2008 Completed

The purpose of this project was to explore the following seniors' needs in the District: infrastructure and planning, housing, health care, social support services, transportation, networking, barriers to mobility, information, and education. The work was carried out by a research team from the Community Development Institute at UNBC in May 2008 with the goal to provide community decision-makers with information relevant to local planning and infrastructure investments. In addition to the project reports, information was shared via a 2 community meetings.

http://www.unbc.ca/cdi/seniorhtml.html

Peace River Regional District Seniors' Needs Overview 2008 Completed

Following completion of the 2006 - 2007 Peace River Regional District Seniors' Needs Overview study, the CDI was invited back to participate in 2 community open house workshops to help develop a plan for action by the PRRD. The meetings were held in Dawson Creek and Fort St. John.

Distance Education Lessons: The case of McBride - Prince George BC 2007-2009 On-going

Under the direction of visiting scholar Dr. Rosemary Raygada-Watanabe, the CDI is examining the video education linkage between McBride Secondary School and 2 secondary schools in Prince George (Kelly Road Secondary School and Prince George Secondary School SS not DP Todd] in Prince George. Given the challenge that rural and small town places have with providing services, it is crucial that new information technology be investigated as a possible source of assistance. This project examines the case study with a view to identifying lessons on the application of distance teaching video technologies.

Omineca Beetle Action Coalition's Future Forest Summit 2008 Completed

On September 19th, 2008, a Future Forest Summit was hosted at UNBC through a partnership between UNBC's Community Development Institute (CDI) and the Omineca Beetle Action Coalition (OBAC). Results from the Summit were to inform OBAC's "Future Forest Products and Fibre Use Strategy". With a focus on future forest and fibre opportunities, the central message was that communities want the future forest to support economic opportunity (for a range of small to large economic players), quality of life, and the environmental services that protect both economic and quality of life assets. The discussion focussed on the need to create viable community futures. This included attention to keeping resource revenues in the north to sustain social and economic development, and to renew infrastructure for moving into more diverse and viable future economies. Funding for this project came from Western Economic Diversification Canada's Community Economic Development Initiative and OBAC.

http://www.unbc.ca/cdi/research.html

Community Transition Toolkit

2008 Completed

The Community Development Institute (CDI) documented community economic transition best practices and performed a gap analysis of the social and community services available within the Omineca Beetle Action Coalition (OBAC) communities that can support transition. The project built upon the expertise developed at the CDI through working for a number of years with individual communities across northern BC on community transition planning. Specifically, o frvi4(h)(B)7(C)-3eorthed to coped r

Attraction' strategic planning processes. The Community Transition Toolkit is of immediate use to OBAC and its member communities, and it is being shared with communities across BC through the BC Ministry of Community Services for the broadest possible dissemination and impact.

http://www.unbc.ca/cdi/research.html

Northern Medical Program Evaluation

2007-2009 On-going

A group of researchers at both UNBC and UBC, led by Dr. Neil Hanlon in UNBC's Geography Program, received a research grant from the BC Medical Services Foundation to evaluation the impact of the Northern Medical Program on physician recruitment and retention in its host community. A specific focus was to be on the role of social capital and social cohesion. The CDI will design a questionnaire and use it to interview local physicians and NMP organizers. The CDI will also provide analysis of the social capital building aspects of the NMP.

Service Industry Sector Project

2007- 2009 On-going

Much has been written about the transformation of the North American economy and the rise of the Service Industry sector. As knowledge and information become increasingly valued commodities, the need for workers in all components of the Service Industry sector will be crucial to extracting increased value and GDP from the traditional basic sectors of the economy. Employment pressures/shortages within the Service Industry sector means that this has emerged as a critical labour market issue in northern BC. With funding from Service Canada, this project seeks to delineate this labour market issue and identify practical responses to addressing gaps/needs in both the short and long term.

'Warmth of Welcome' Project

2007-2009 On-going

Through collaborative and action research plans, Catherine Nolin, Greg Halseth, and members of the Immigrant and Multicultural Services Society (IMSS) will work together to highlight the barriers to, and needs for, the strengthened participation of new immigrants in northern community life as well as develop recommendations and concrete initiatives which foster more inclusive and welcoming communities for new immigrants in northern BC. A dearth of research on non-metropolitan immigrant settlement in Canada means that the experience of whole regions of the country is little understood. Activities are being carried out in Ft. St. John, Prince George, and Terrace.

2007-2008 Completed

The purpose of this project was to conduct community-based interviews in UNBC's service region. Across community landscapes that are experiencing increasing pressures from social, demographic, economic, and political change, part of UNBC's mandate has been to provide needed education and research services. This project was undertaken at the request of UNBC's Vice-President and Provost as part of an initiative to better connect UNBC's activities with the needs of its service region. Two basic questions drive the interviews; "what do our communities need to know?" and "what would they like the university to do?"

http://www.unbc.ca/cdi/research.html

Agriculture Potential Across Northern BC

2008

On-going

The CDI coordinated the start of a dialogue between a number of Community Futures offices in northern BC and interested UNBC researchers. The dialogue concerns the future potential of agriculture industry expansion across the region. They are at present scoping out options, resources, knowledge (and gaps) to identify whether there is a foundation and potential for more investigation. More than 11 UNBC researchers expressed an interest in participating, covering research topics in agriculture, agricultural industry development, future climate and environmental scenarios for the region, changing energy costs and their impacts on agricultural production, food security, and various forms of mainstream and alternative produce marketing and distribution mechanisms.

The Community Development Institute hopes to enhance capacity building through educational opportunities. This includes student training, work within the university curriculum, continuing education and regional offerings, connections with the northern colleges and with specialized education and training centres, and public talks/conferences to share information.

The CDI's Community Speaker's Series invites experts to talk on important and relevant topics for northern BC. The Community Speaker's Series consists of classroom lectures at UNBC, a public lecture in Prince George, and a public talk in another northern BC community. These lectures are free and open to the public.

Spring 2008

Mr. Graham Kedgley, British Columbia's former Coal Co-ordinator, spoke on "Lessons from the development of Northeast Coal". Mr. Kedgley's talk centred on his experiences as British Columbia's Coal Co-ordinator and lessons that may be applicable to future mining development in Northern BC.

These public talks were held in Prince George on Tuesday, April 08, 2008 room 7-150, UNBC Prince George campus and in Smithers on Wednesday, April 09, 2008 at the Smithers campus of Northwest Community College.

This Community Speakers Series event was co-sponsored by the Town of Smithers and UNBC's Northwest Regional Office.

Geography Program (BA) major: Public Administration and Community Development

A number of years ago, the CDI initiated a process to better connect UNBC with the Nicola Valley Institute of Technology (NVIT). NVIT is based in Merritt, but it offers a wide number of programs, certificates, and diplomas targeted to aboriginal communities around BC. Since that time, processes have been set in place to coordinate the paperwork and processes for NVIT students transferring to UNBC. In addition one of the decisions at that early set of meetings was that UNBC would try to identify a 'destination' for graduates from NVIT's Public Administration and Community Economic Development diplomas. Discussions at UNBC identified additional opportunities around these same topic areas.

, c,

The CDI is a resource centre to which communities and decision-makers can turn in their search for timely and relevant information. It is also be a conduit through which information from outside the region is shared with communities. Building upon a strong "extension" tradition to connect research and training opportunities with community

Effective local capacity is the key to building responsive and resilient communities and organizations. For local and First Nations governments, the public administration training and capacity of the staff is critical in determining the effectiveness and resilience the governing body. Recruitment and retention of local and First Nations government employees is an immediate and ongoing concern for communities in northern British Columbia. As a result, the CDI (together with Dr. Gary Wilson of UNBC's Political Science Program) is partnering with the Ministry of Community Development and the Fraser Fort George Regional District to initiate the creation of enhanced public administration education training opportunities in northern BC. Some key issues include:

- That local governments in northern BC are training grounds or incubators of professional staff and it is not uncommon for professionals to move to larger and more sophisticated organizations.
- Stimulating interest in local and first nations government as a rewarding and desirable career choice.
- Succession training of existing staff is hampered by capacity / availability issues
- Need to coordinate a range of options that meet the 68dus (i)-2(s)-1(t)-2(r)3(i)1(ue)4(s)- key ipr -13

The workshop brought together 23 rural and small town scholars from 8 OECD countries to discuss possibilities about what our next rural economies will look like. Older approaches to community and economic development focused upon a 'space-economy' with attention to comparative advantages and overcoming the cost of distances. This approach is being replaced by recognition of the growing importance of 'place-based economies' where the unique attributes and assets of individual places now determine its attractiveness for particular types of activities and investments.

Although the speakers are invited rural and small town development scholars, the workshop was open to local government and economic development representatives from across northern BC so that the dialogue from this opportunity can have an immediate impact. More the 70 people from northern BC attended to learn from this event. The

Community visits form an integral part of the CDI mission. They are part of our ongoing efforts to build and grow relationships, collect and share community development information, identify new topics and issues of relevance to our community partners, and evaluate ways by which we can get needed information into the hands of our communities. Community visits not only include meetings with individuals and organizations, but often also includes public speaking invitations from community groups, local government / band councils, and chambers of commerce.
